

**Justice Information Committee**  
**April 30, 2000\**

Members present:

Paul Taylor, Deputy Director

Department of Information Services

Mike Vandiver, Tumwater Police Chief

Washington Association of Sheriffs and Police Chiefs

Joe Lehman, Department of Corrections

Clifford Stiltz, District Court Judges Association

Tony Susinski, Association of Washington Cities

Kim Eaton, Washington Association of County Clerks (via telephone)

Others Present:

Commander Bob Lopez, Washington State Patrol

Bev Hempleman, Office of Financial Management

Harold Nelson, Office of Financial Management

Gerry McDougal, Department of Licensing

Don Price, Department of Corrections

Dennis Hausman, Department of Information Services

The meeting was called to order at 1:30 p.m. by Paul Taylor.

**Approval of minutes** - The minutes from October 4, 1999, were approved.

**Accomplishments of the Criminal Justice Community**  
***Toward the 1999-2001 Biennial Integration Blueprint***

Commander Lopez provided a handout complete with status reports on the WACIS/WASIS Rewrite, Process Control Implementation and Live Scan implementation. He stated the WACIS/WASIS project was completed in November 1999, 29 counties have full implementation of PCN, 8 counties are planning their implementation of PCN, and 2 counties remain to be scheduled for PCN guidelines development. Live Scan has been installed in 23 sites.

Chief Vandiver stated they were not successful in obtaining federal funds for the Jail Management System. They are now looking for another funding source, and the project is currently on hold.

Dennis Hausman stated he has met with counties and cities to discuss the JIN, JIC, CJIA etc. He continues his efforts to reach out to local jurisdictions and get them involved. Currently will have met with 21 counties by the end of April.

***Allied Initiatives***

**OMNI (OBTS rewrite)** - Don Price stated the contract was awarded to IBM Global Services and that Global is certified as level 3 in Capability Maturity Model. A kick-off was held November 30<sup>th</sup>, and the project started immediately. The first phase of the project has a cost estimate of 7.3 million dollars. They anticipate that this will ultimately be an eight year project, which will include many more phases. The title of the system is OMNI, which stands for Offender Management Network Information.

**Digital Drivers License** - Gerry McDougal said an RFP was released in January 2000 for the project and Polaroid was selected as the vendor. A contract has been signed and a kickoff meeting was held. A work group is meeting to discuss what exactly will be on the new license. Pilot projects are scheduled for 2001.

**Electronic Judgement and Sentence** - Paul Taylor, DIS

Paul Taylor provided a handout from the Courts, as a representative could not attend the meeting. The update provided information on the JIS strategic plan, Electronic Judgement and Sentence project, Data Standards and Architecture sub-committee, Electronic Citations and the Summary Offender Profile project.

**Summary Offender Profile** - Paul Taylor, DIS

A blueprint for the Summary Offender Profile has been started, handouts were provided. Work continues at the executive level gathering information about people within these systems. A cost estimate for to get the SOP up and running is not known at this time. Steve Kolodney asked for a motion to move ahead with the project and to return to the JIC with progress and results. A motion was made and carried unanimously.

**2001-2003 Biennial Budget Process and Expectations** - Peter Antolin, OFM

Peter stated for the 2001-2003 biennial budgets, OFM is requesting projects be clearly identified. He requested that the CJIA and JIC work together to coordinate the projects and submit a proposal to OFM. OFM will have the final say in what goes in to the budget request. Bev Hempleman is creating a template to use for the proposals to OFM. That template will be shared at the April 18<sup>th</sup> CJIA meeting.

**JIN 2000 Conference Proposal** - Bob Leichner, WSP

A JIN conference will be held in September of 2000 in the Sea-Tac area. Attendance is estimated at 350 people, an agenda is being created. Further information should be available at the next JIC meeting.

**JIC Sub-Committee Reports**

**Radio Interoperability** - Mike Vandiver, WASPC

Chief Vandiver stated that Clark Palmer from the Patrol was Chair of the sub-committee, but was unable to attend the meeting. A funding request has been submitted as part of the Patrol's budget. In the meantime the committee has contacted other states on their lessons learned in this process; developed survey tools that apply to the state of Washington; collected examples of other states Requests for Proposals; contacted shared client services; and developed a list of applications/groups to contact and share what Washington State is doing to get their feedback and support. There is concern that this

sub-committee has regarding the use of 700Mhz bandwidth. It is possible that the FCC and the Canadian government are about to sign a letter of understanding that will give the Canadian government unrestricted access to the 700Mhz spectrum for them to use with high definition television. This restriction will extend 400 km south of the Canadian/US boarder, or as far south as Springfield, Oregon. The 700Mhz spectrum has just been made available to law and safety agencies. If the FCC allows this access, it will effectively eliminate these frequencies for use by the law and safety community in the northern states. Clark Palmer will draft a letter to the FCC on this issue for Joe Dear's signature.

**Enterprise Funding - Enterprise Funding** - Dennis Hausman, DIS

**New Business**

**Adjourned**

Next meeting is scheduled for June 8, 2000.
